

Individual reflection 1 - Elin Forsberg

- What do I want to learn or understand better?
 - I would like to learn how to effectively work together with a larger size group and how to use SCRUM correctly
- How can I help someone else, or the entire team, to learn something new?
 - Depending on what we decide to do, everyone may have some sort of experience. I have experience with programming games both with and without the help of Unity and can help guide team member in how to do that
 - I can also help with learning about Scrum so that we can all understand what it is all about
- What is my contribution towards the team's use of Scrum?
 - I have helped come up with a meeting schedule for the team and I have also set up a discord server that the team will use for communication and write important things such as different links and the schedule for meetings.
- What is my contribution towards the team's deliveries?
 - I, the same as the other members, helped write the social contract for the group and made plans for when we shall make these deliveries.
